

# Case Study

Attric is the leading UK consulting and services company specialising in the development, management and delivery of technical information, procedural documentation, asset / maintenance management and engineering support services.

**Client:** UK Based Gas Storage Company

**Project:** Provide a hosted Electronic Document Management System (EDMS) for Client and its Third Party Contractors

**Scope:** Migrate data and documents from the Client's existing EDMS into Attric's AttView EDMS whilst ensuring no loss of access to critical information for end users.

Provide a complete hosting solution for the EDMS including:

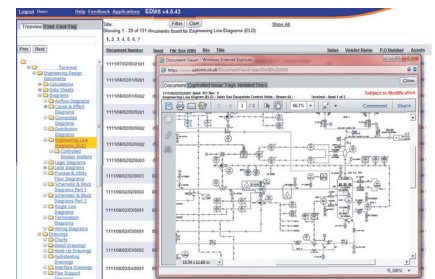

- Complete, real-time data replication between two data centres with automated failover technology ensuring over 99.97% up time.
- 24/7 Support and monitoring with automated email and text alerts.
- Comprehensive backup and disaster recovery provision.

Create data mapping and migration processes to ensure no loss of information.

Provision of on site training to all organisations accessing the EDMS prior to Go Live to ensure that users are able to access the information they require to maintain safe operation of Onshore and Offshore Assets.

All work was carried out by our EDMS Software Administrators and Project Managers based at our UK Head Office.

## Electronic Document Management

### Data:

240,000 Document Records

110,000 Electronic Document Files

800 Users across the UK accessing the EDMS

Comprehensive hosting solution

Twin Data Centres with full data replication
